

# Historical U.S. Methyl Bromide Sales

**Historical Production of Methyl Bromide in the United States**  
(1984-1991 and 1994-1999)

Year	Sales (MT)	Sales (lbs)
1984	19,659	43,328,436
1985	20,062	44,216,648
1986	20,410	44,983,640
1987	23,004	50,700,816
1988	24,848	54,764,992
1989	26,083	57,486,932
1990	28,101	61,934,604
1991	28,180	62,108,720
1994	28,218	62,192,472
1995	25,557	56,327,628
1996	26,866	59,212,664
1997	26,969	59,439,676
1998	27,454	60,508,616
1999	24,560	54,130,240

## Historical Sales and Consumption of Methyl Bromide -- United States

- North American sales (i.e., U.S., Mexico, and Canada) of methyl bromide from 1984 through 1990 were available from UNEP (1995) and were assumed to be equal to U.S. sales based on relatively low methyl bromide use in Mexico and Canada during this period.
- In the above table, production of methyl bromide is assumed to be equal to sales, where sales include portions intended for both domestic consumption and export.
- Data for the years 1991 through 1999 were obtained from SPD's Allowance and Post Phaseout Tracking System.
